

mApproval

*Mobile solution for enterprise approving processes,
either as a generic action, or for a specific business object.*

The process of Approving is a hot topic in every operating enterprise. Particular approval requests, their quantity and complexity varies on the company's size and type, nevertheless one generic rule always apply- The amount of deciding/ approving grows with the manager's position and therefore it logically burdens the most busy ones.

mApproval provides you with all the context information (including the attachments) necessary for the decision-making.

Included in the package are configurable program settings, which let the customer easily widen the functional portfolio with new types of workflows or business objects.
